

Keep Your Home Pest-Free: A Proactive Guide

This guide will help you prevent pests and keep your apartment comfortable. By following these simple tips, you can make your home less attractive to unwelcome guests.

Stop pests before they start!

Much like us, pests seek food, water, and shelter. Here are some proactive steps you can take to help maintain an environment that doesn't attract pests.

- Clean up crumbs and spills after cooking and eating
- Store food in sealed containers and dispose of trash in tightly sealed bags
- Fix leaky faucets and don't let water build up in sinks, drains, or plant trays
- Clear clutter inside and outside your apartment
- Maintain a gap between plants and your walls

Know the signs of a pest problem:

- Tiny piles of sawdust or specks that look like pepper
- Appearance** of water damage with **no moisture** present
- Dead insects and/or dropped wings
- Structural damage (holes in walls, chew marks).
- Strange noises coming from inside the walls
- Unusual smells like urine or droppings
- Bites or stings on you or your pets

If you notice any of these signs, report them to Pest Share immediately. Early action can prevent a small problem from becoming a big one.
Working together, we can keep your home pest-free!

See something, say something!
